ADJUST CLAMPING FLANGE SO THAT DIMENSION 'X' IS 5mm WHEN THE TERMINATION HAS BEEN FULLY INSERTED INTO THE RECEPTACLE. ADJUST ORIENTATION OF CLAMPING FLANGE TO MATCH HOLE POSITIONS IN RECEPTACLE. NOTE: ALWAYS ADJUST SO AS TO INCREASE DIMENSION 'X'. ENSURE CLAMPING SCREWS ARE OF SUITABLE LENGTH TO ENGAGE IN THE RECEPTACLE BY 5mm BEFORE THE PRESSURE GAP 'X' IS TAKEN UP. LOCK CLAMPING FLANGE BY TIGHTENING FLANGE GRUB SCREWS AGAINST FERRULE. REMOVE TERMINATION AND GREASE TAPERED SECTION OF RUBBER TERMINATION WITH HIGH VOLTAGE GREASE. REPLACE IN RECEPTACLE AND TIGHTEN DOWN CLAMPING SCREWS EQUALLY. RELEASE SCREWS AND CHECK 'X' IS 5mm. IF NOT RE-ADJUST AS ABOVE. CAUTION:

IT IS IMPORTANT TO CHECK DIMENSION 'X' AFTER APPROXIMATELY ONE WEEK. ADJUST AS ABOVE IF REQUIRED.
